

RISE TO THE CHALLENGE

The preferred global partner at the forefront of innovating for a sustainable future

JEL is a leading engineering and construction company based in Singapore with a strong international foothold. Equipped with multifaceted project management capabilities and a diverse workforce, JEL provides a full range of services in engineering, procurement, construction, and maintenance.

Bolstered by a strong portfolio of more than 870 completed process plant projects, JEL is proficient in full turnkey contracts - mainly for small to medium size simple and combined cycle power plants. JEL has established itself as a key player with over 670 industrial plant projects and over 200 power plant projects under its belt, with the latter accruing over 92,000 MW in over 20 countries.

With more than 50 years of experience, JEL is well-poised to handle power plants, petrochemical refineries, pharmaceutical plants, among other process plants and infrastructure.
